Improvements About

The Santa Fe Shops

stalled, one hundred pounds of air being available in any part of the works.

Near the power house are two immense stand pipes. One sixty-four feet high and twenty-four feet in diameter, the other fifty-four feet high and thirty feet in diameter. Near these tanks a large settling basin built of cement has been made, thirty feet in diameter and thirty-five feet in depth. The waste water will flow into this basin from which it will be pumped into a large tank for the impurities to settle and will then be forced to the smaller tank where it will be ready for use again. This means a saving for the company of many dollars spent for water.

By the public little is known of the splendid improvements that are being made by the Santa Fe in their shops here. A new brick building forty by ninety feet has been finished, this is called the power house. It contains three one hundred and fifty horse power boilers and a complete heating system which furnishes the boilers with hot water thus enabling them to produce their full working power.

A massive engine drives two seventy kilowatt generators that produce electricity for welding, electric cranes, lights and many other uses. The large air compressors will be driven by the generators and a thorough compressed air system is being in-

No More Cheap Railroad Rates

Omaha, Jan. 29.—The Union Pacific and Northwestern railroad have refused to make special rates to the government for the shipment of soldiers en route to the Philippines, to and from San Francisco. Yesterday bids were opened at Omaha for the transportation of 600 men and 500 horses and a large amount of equipment from Fort Robinson and Russell to San Francisco. Only the Union Pacific and Northwestern bid, and both were for the regular full rates. The railroad officials say the government will secure no more cheap fares.

Governor Entertains

Governor Hagerman last Thursday evening entertained at dinner, the members of his staff, at Santa Fe. The affair was informal and was marked by tempting courses and conviviality. The guests were: Attorney General W. C. Reid, Colonels J. Leahy, Raton, H. H. Betts of Silver City, R. E. Twitchell, of Las Vegas, C. L. Ballard, of Roswell, Jose D. Sena and James A. Massie, Dr. E. McQueen Gray.

OUTPUT INCREASING.

That the Phelps-Dodge coal mines at Dawson, N. M., are becoming an important source of fuel supply for the southwestern states and territories was brought to light very forcibly during the recent coal famine, when the only supply of fuel received in Bisbee, Cananea, Clifton, Morenci and other important centers came from those mines, says the Bisbee Review. Owing to this fact, the management of the company has formulated plans for the extensive development of its properties, and the plans are now being carried out.

The estimated output of the mines for this month is eighty thousand tons of coal, as against an output of fifty-five thousand tons during the same period last year. This big increase of production is due to the extension of operations, and the many improvements which have been made in the facilities for handling the product.

A PRINTER, NAMED M'CAULY WORKED TUCUMCARI EDITOR

One E. E. McCauly, a hobo printer, who blew into this office Monday one week ago and who was employed by our office foreman, worked until Saturday night at 6 o'clock when he was paid off and began a glorious old booze which lasted until Monday morning, says the Tucumcari News. During his pla at the whiskey glasses he tried the various gambling games and when his week's salary was exhausted he began drawing checks on the Tucumcari First National bank and forging the name of the Tucumcari Printing company by the editor of the paper as its business manager and cashed half a dozen or more checks in this manner. He played the boys a lively game until he would go broke then he would proceed to make some more checks. The forgery was not discovered until he was out of town Monday so he made his temporary getaway, but if he stays on earth he will never get away as our officers and those who have been bilked by him are not going to quit. He got two other printers who are employed in this office into trouble by cashing checks on them also. One of them is in jail now for check work that in the opinion of this paper was the villany of McCauly. McCauly hails from Kooker, Okla., and we are informed has a wife there.—Tucumcari Times.

Congress has passed a bill granting a pension of \$30 per month to Smith H. Simpson, formerly captain of the First New Mexico volunteer infantry. The captain has been a citizen of Taos county for half a century and during that time has kept the American flag flying to the breeze above the plaza at Taos.

New Mexico Mines

El Paso Paper Tells of the Resources of the Sunshine Territory

El Paso Herald: With the continued increase in the market price of copper, many mines and prospects that before lay idle now acquire solid values. With copper ruling so high and likely to stay over 20 for a long time to come, it pays to develop properties that would not have returned a profit with copper at the old rates, 12 cents or thereabouts. If New Mexico does not leap forward during this period of great mining activity and high prices it will be not because she has not the pay ore, but because her people are not alive to the great opportunity presented.

New Mexico is among the very richest mineral regions in the country. In the old days it was famous producer, but unfortunately some of the pioneer miners were inclined to take only what was handed to them and to skate around the problem of real mining. They not only left enormous values in the ground but they gave New Mexico a blow to her prestige that she has not yet wholly recovered from.
